PROFESSIONAL SUMMARY

Front-End Developer with experience delivering production-ready web applications using React and Next.js. Contributed to national-level education data platforms serving 100,000+ daily users by building responsive dashboards and integrating RESTful APIs. Refined UI performance, ensured data accuracy in multi-user systems, and collaborated with cross-functional teams to ship reliable features.

EXPERIENCE

Full-Stack Developer November 2024 – Present

Sapphire Consulting Services

- Contributed to the development of PIE & NODP, national education data platforms supporting **100,000+ daily users** and **300,000+ institutional records** across Pakistan
- Developed and managed RSU Sindh (Reform Support Unit) – Sindh School Education & Literacy dashboards and data workflows

Frontend Developer Dipixels

March 2023 – October 2024

- Delivered pixel-perfect, responsive UI components that increased user engagement by 25%
- Integrated RESTful and third-party APIs, reducing data load times by 30%
- Implemented React Context and Redux for centralized state management, data handling efficiency by 40%
- Performed Jest testing, Upgraded reliability and reducing production issues by 20%
- Optimized frontend build processes and asset delivery pipelines, resulting in 40% faster application loading speeds and improved overall user experience.
- Contributed to code reviews, applying industry best practices and Refined code quality

Web Developer Intern Stratesfy Inc

August 2023 – December 2023

- Expanded and maintained a dynamic, user-friendly WordPress website for Gao RFID Inc., increasing page views and session duration
- Streamlined the design process using Webflow, reducing development turnaround time by 25%
- Collaborated with senior developers to apply software design principles and best practices, improving code readability and maintainability

PROJECTS

NODP PIE (Pakistan Institution Education) | MERN stack

- Build and Implemented user-facing features using Angular and React for large-scale education data platforms
- Translated UI/UX wireframes into reusable, high-quality components ensuring consistency across dashboards
- Collaborated on a government education data platform serving 300,000+ institutions across Pakistan, handling 300,000+ records
- Engineered a React-based frontend handling 100,000+ daily active users and integrated with Spring Boot & Node.js APIs
- Increased data synchronization accuracy by 90%, reducing duplicate or inconsistent records
- Fast API calls, reducing dashboard load time by 1-2 seconds
- Supported multi-user access with role-based permissions for 500+ administrative users

RSU Sindh (Reform Support Unit) – Sindh School Education & Literacy | MERN Stack

- Boosted education data workflows and Strengthened provincial EMIS systems, enabling consistent reporting and more informed national-level education planning
- Standardized education data workflows used across 30 districts in Sindh
- EMIS reporting system processing 10,000+ school records annually
- Built real-time dashboards supporting annual census data of 10,000+ schools
- Reduced reporting turnaround time by 30–50% through dashboard automation

Employee Management System | Java, Spring Boot, MySQL, HTML, CSS, JavaScript, Bootstrap

- Enhanced an employee management system with role-based access, CRUD operations on a Spring Boot–MySQL backend, and a responsive HTML/JavaScript/Bootstrap frontend using Git for version control

EDUCATION Bachelor of Science in Computer Science (BSCS)

Dec 2019–Dec 2023 **Federal Urdu University of Arts, Science & Technology (3.5 cgpa)**

SKILLS

Basics : HTML CSS JavaScript

Frameworks : React.js Next.js Vue.js Angular Tailwind MUI Bootstrap GSAP jQuery

Tools: Redux Toolkit WordPress Figma Canva Jira Trello Notion Google Workspace Microsoft Office Git/GitHub

Database: MySQL, MongoDB
